

Topic: *“From Academia to a Start-up: The Determina Story”*

Speaker: Dr. Saman Amarasinghe, CTO and Co-Founder, Determina, Inc.

Biography

A member of MIT’s Computer Science and Artificial Intelligence Laboratory (CSAIL), Saman's research has focused on computer security, compiler optimization and computer architecture. He has authored more than 50 technical publications and served on 15 program committees of international conferences. Saman's research into runtime program analyses led to Determina's groundbreaking “Memory Firewall” technology. He is currently the CTO of Determina Inc., the provider of the only zero-touch Intrusion Prevention Solution. Saman has a BS in Electrical Engineering and Computer Science from Cornell University and a MS and PhD from Stanford University.
